

QuickPan™ Spherical Camera Arm for the Manfrotto QTVR Tripod Head

The World's Leading Provider of Photographic VR Solutions for the Internet™

The Kaidan QuickPan™ Spherical Camera Arm for the Manfrotto QTVR tripod head transforms your Manfrotto QTVR head into a multirow panoramic tripod head.

With this arm you'll be all ready to shoot multirow panoramas that can be processed to create the very latest QuickTime VR Cubic panoramas or other panoramas that support full-view imagery (i.e. MGI Zoom Viewer, PTViewer).

The QuickPan Spherical Camera Arm uses the same new multirow elevation mechanism as our QuickPan and KiWi™ Spherical tripod heads. Adjusting the elevation of the camera anywhere between +/- 90 degrees is quick and easy. Just loosen the knob and rotate the arm to the desired position. A friction clutch, similar to a hinged laptop computer screen, keeps the camera arm from falling in an uncontrolled manner. A clamp knob is provided to position the center of the lens directly over the center of rotation of the tripod head.

Kaidan offers several camera brackets designed to hold virtually any camera. Contact Kaidan, visit the Kaidan website or your authorized Kaidan dealer to determine which camera bracket is best for your camera and application.

QuickPan Spherical Camera Arm for the Manfrotto QTVR Tripod Head (QPSM-1)

- ✓ **Modular** Attaches to your existing Manfrotto QTVR Tripod Head
- ✓ **Design** Secure and accurate positioning of camera elevation
- ✓ **Versatility** Can support a wide range of cameras and lenses
- ✓ **Guaranteed** One-year limited warranty on parts and workmanship

The QuickPan Spherical Camera Arm for the Manfrotto QTVR head attaches to the standard Bogen-Manfrotto quick-release plate. Just remove the standard Bogen fixed upright bracket and replace it with the QuickPan Spherical Arm. The QuickPan Spherical Arm will work with all models of the Manfrotto QTVR head.
